

### Description

Full line of all-weather, quality-built deadline anchors pull capacities from 30,000 to 100,000 pounds. Constructed with top-quality steel and proof-tested to 120% of rated capacity, Deadline Anchors are highly accurate, super-strong anchors of exceptional reliability. Anchors are for use with 16" Weight Indicator Series and Load Sensors.

**75,000 LB Single Line Pull**

### Features

Various models to accommodate common wireline sizes from 5/8 inches to 1-7/8 inches.

Single pull capacities from 30,000 to 100,000 pounds to accommodate all your needs.

Heavy Duty for years of trouble free service.

### Benefits

All Drum surfaces are machined to extend cable life.

Anchors are designed and tested for high strength, long life and exceptional accuracy.

Quality control procedures test each and every anchor to 120% of rated capacity to ensure reliability and safety.

Quality and service have combined to ensure you don't have to wait months for an anchor; most common models are stocked in Canada and the USA for quick delivery.

### Specifications

Anchor type weight indicator system is compatible with various versions of drilling rigs and workover rigs.

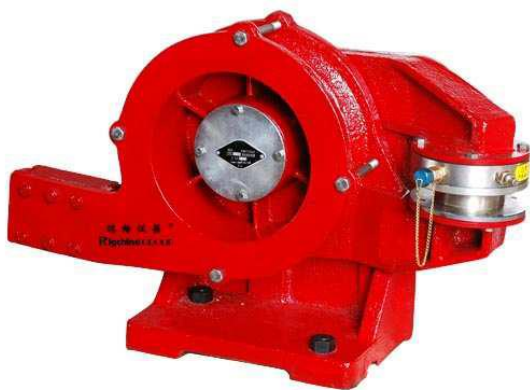

They indicate and record variation of hook load and weight on bit during drilling.

They have good services for the driller judging the operation situation and obtain proper drilling parameters.

Each set of weight indicating system consists of a deadline anchor, a weight indicator and a recorder.

The anchor type weight indicator provides drillers with an easy-to-use way to track hook load and weight on bits.
